BURPOLEN C1503 T2 BLACK

Version 1.1 Revision Date 01/10/2020 MSDS NO : BRPL-C1503

3. Composition/information on ingredients

3.1 Substances Ingredients

Chemical Name	CAS-No. EINECS-No. / ELINCS	Weight %	Component Type
Polypropylene	9003-07-0	79	
Talcium	14807-96-6	20	
Further Additives	-	1	

Contains: Stabilizers

4. First aid measures

4.1 Description of first-aid measures

General advice : If inhaled: In case of skin contact:	Take proper precautions to ensure your own health and safety before attempting rescue and providing first aid. Remove person to fresh air. If signs/symptoms continue, get medical attention. In case of excessive inhalation of fumes that may be generated during heating of this material, move the person to fresh air. Obtain medical If molten material contacts the skin, immediately flush with large amounts of water to cool the affected tissue and polymer. Do not attempt to peel polymer from skin as this will remove the skin. Obtain immediate emergency
In case of eye contact: In case of eye contact with molten	Flush eyes thoroughly with water for several minutes and seek medical attention if discomfort persists. Continuously flush eye(s) with cool running water for at least 15 minutes. Beyond flushing, DO NOT attempt to remove the material adherent to the
If swallowed:	Adverse health effects due to ingestion are not anticipated.
4.2 Most important s	symptoms and effects, both acute and delayed
Symptoms:	Inhalation of process fumes and vapors may cause soreness in the nose and throat and coughing.
Hazards:	Dust contact with the eyes can lead to mechanical irritation. Molten polymer may cause thermal burns.
4.3 Indication of any	immediate medical attention and special treatment needed
Treatment:	Treatment of overexposure should be directed at the control of symptoms and the clinical condition of the patient.

fighting :	Version 1.1 Revision Date 01/10/2020 MSDS NO : BRPL-C1503 SMALL FIRE: Use dry chemical, CO2, or water spray. LARGE FIRES: Use water spray hose nozzles from a safe location. None known. Version 1.1 Revision Date 01/10/2020 MSDS NO : BRPL-C1503
 5.1 Extinguishing media Suitable extinguishing media: Unsuitable extinguishing media: 5.2 Special hazards arising from t Specific hazards during fire fighting : 	LARGE FIRES: Use water spray hose nozzles from a safe location. None known. the substance or mixture Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide,
Suitable extinguishing media: Unsuitable extinguishing media: 5.2 Special hazards arising from t Specific hazards during fire fighting :	LARGE FIRES: Use water spray hose nozzles from a safe location. None known. the substance or mixture Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide,
Unsuitable extinguishing media: 5.2 Special hazards arising from t Specific hazards during fire fighting :	LARGE FIRES: Use water spray hose nozzles from a safe location. None known. the substance or mixture Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide,
5.2 Special hazards arising from t Specific hazards during fire fighting :	None known. the substance or mixture Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide,
5.2 Special hazards arising from t Specific hazards during fire fighting :	t he substance or mixture Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide,
Specific hazards during fire fighting :	Keep away from heat and sources of ignition. In case of fire hazardous decomposition products may be produced such as: Carbon monoxide,
fighting :	decomposition products may be produced such as: Carbon monoxide,
	The formation of hydrocarbons and aldehydes are possible in the initial stages of a fire (especially in between 400 C and 700 C)
5.3 Advice for firefighters	
	Wear approved positive pressure self-contained breathing apparatus and firefighter protective clothing.
	Combustible particulate solid, will decompose under fire conditions. Calorific Value: 8000 - 11000 kcal/kg
	Fight fire from safe distance with hose lines or monitor nozzles. Heat from fire may melt, decompose polymer, and generate flammable vapors. Move containers from fire area if it can be done without risk. Evacuate immediately in the event of opening of storage container pressure relief devices or discoloration of container. Always stay away from tanks engulf in fire. Do not attempt to get on top of storage containers involved in fire Cool storage containers with large volumes of water even after fire is out.
ccidental release measures	
Personal precautions:	tive equipment and emergency procedures Equip responders with proper protection. Creates dangerous slipping haza on any hard smooth surface. Equip emergency responders with proper personal protective equipment (PPE) Avoid generating dust. Avoid dispers
	of dust in the air (i.e., clearing dust surfaces with compressed air). Potent combustible dust hazard. Polymer particles create slipping hazard on harc smooth surfaces.

SAFETY DATA SHEET	According to Regulation (EC) No. 1907/2006 🏾 🏉 burpo
BURPOLEN C1503 T2 BLAG	CK Version 1.1 Revision Date 01/10/2020 MSDS NO : BRPL-C1503
6.2 Environmental precautions	
Environmental precautions :	Do not flush into surface water or sanitary sewer system.
6.3 Methods and materials for	containment and cleaning up
Methods for cleaning up :	On land, sweep/shovel into suitable disposal containers or vacuum using equipment which avoids ignition risk. On water, material is insoluble; colle and contain as any solid. All recovered material should be packaged, labele transported and disposed of or reclaimed in conformance with applicable laws and regulations and in conformance with good engineering practices. Reclaim where possible.
ng and storage	
7.1 Precautions for safe handling	ng
Advice on safe handling :	Material is in a pellet form. If converted to small particles during further processing, handling, or by other means, may form combustible dust concentrations in air. Avoid dust accumulation in enclosed space. Avoid generating dust; fine dust suspended in air and in the presence of an igniti source is a potential dust explosion hazard. Static discharge (spark), or oth ignition sources, in high dust environments may ignite the dust and result a dust explosion Electrostatic charge may build during conveying or handling. Equipment handling polymer should be conductive and grounde
	conform to applicable electric codes and regulatory requirements for area handling combustible dusts. After handling, always wash hands thoroughl with soap and water. When bringing the material to processing
Fire-fighting class :	material should be grounded and bonded. All electrical equipment should conform to applicable electric codes and regulatory requirements for area handling combustible dusts. After handling, always wash hands thoroughly with soap and water. When bringing the material to processing temperatures vapors may develop may condense in the exhaust ventilation
7.2 Conditions for safe storage	material should be grounded and bonded. All electrical equipment should conform to applicable electric codes and regulatory requirements for area handling combustible dusts. After handling, always wash hands thoroughle with soap and water. When bringing the material to processing temperatures vapors may develop may condense in the exhaust ventilation See section 10.

SAFETY DATA SHEET

BURPOLEN C1503 T2 BLACK

Version 1.1 Revision Date 01/10/2020 MSDS NO : BRPL-C1503

8. Exposure controls/personal protection

8.1 Control parameters

Ingredients with workplace control parameters Occupational Exposure Limits

Ingredients	CAS-No.	Туре	Limit Value	Basis Revision Date	Additional Information
Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust		TWA	10 mg/m3 inhalable	US (ACGIH) 2005	
Materials that can be formed when handling this product: Non- specified (inert or nuisance) dust		TWA	3 mg/m3 respirable	US (ACGIH) 2005	

Consult local authorities for acceptable exposure limits.

8.2 Exposure controls

Engineering measures

Follow the recommendations in international standard NFPA 654 (as amended and adopted) for equipment used to handle this product. Engineering controls, i.e. enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Personal protective equipment

Respiratory protection :	Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere exceeds recommended limits. Where workers could be exposed to dust concentrations above the exposure limit they must use appropriate certified respirators.

SAFETY DATA SHEET	According to Regulation (EC) No. 1907/2006 Durpol
BURPOLEN C1503 T2 BLA	CK Version 1.1 Revision Date 01/10/2020 MSDS NO : BRPL-C1503
Hand protection :	Wear gloves that provide thermal protection where there is a potential for contact with heated material.
Eye and face protection :	Dust service goggles should be worn to prevent mechanical injury or other irritation to eyes due to airborne particles which may result from handling this product.
Skin and body protection :	Wear suitable protective clothing.
Hygiene measures :	Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Take off contaminated clothing and wash before reuse.
Environmental exposure of	controls
General advice : See secti	on 6.
9. Physical and chemical properties	
9.1 Information on basic physic	cal and chemical properties
Appearance	: Pellets.
Color	: Translucent to white
Odor	: Slight.
Lower explosion limit	: Note: The minimum explosive concentration (MEC) for polymer dust varies according to particle size distribution.
Upper explosion limit	: Note: Not applicable.
Flammability (solid, gas)	: Polymer will burn but does not easily ignite.
Oxidizing properties	: Not considered an oxidizing agent.
Autoignition temperature	: > 300 °C
рН	: Note: Not applicable.

SAFETY DATA SHEET	According to Regulation (EC) No. 1907/2006
BURPOLEN C1503 T2 BLACK	Version 1.1 Revision Date 01/10/2020 MSDS NO : BRPL-C1503
Melting point/range	: 50 - 170 °C
Boiling point/boiling range	: Note: Not applicable.
Vapor pressure	: Note: Not applicable.
Density	: ≤ 1.15 g/cm3
Water solubility	: Note: Insoluble.
Partition coefficient: n- octanol/water	: Note: No Data Available.
Viscosity, dynamic	: Note: Not applicable.
Relative vapor density	: Note: Not applicable.
Evaporation rate	: Note: Not applicable.
Explosive properties	: Note: No Data Available.
10. Stability and reactivity	
10.1 Reactivity	
No known reactivity hazards.	
10.2 Chemical stability	
Stable under normal conditions.	
10.3 Possibility of hazardous reactions	
Hazardous reactions	: Will not occur.
10.4 Conditions to avoid	
Conditions to avoid	: Avoid contact with strong oxidizers, excessive heat, sparks or open flame.
10.5 Incompatible materials	
Materials to avoid	: Material may be softened by some hydrocarbons.

SAFETY DATA SHEET	According to Regulation (EC) No. 1907/2006
BURPOLEN C1503 T2 BLACK	Version 1.1 Revision Date 01/10/2020 MSDS NO : BRPL-C1503
10.6 Hazardous decomposition products	
Hazardous decomposition products :	Not expected to decompose under normal conditions.
Thermal decomposition :	Note: Carbon monoxide, olefinic and paraffinic compounds, trace amounts of organic acids, ketones, aldehydes and alcohols may be formed.
11. Toxicological information	
11.1 Information on toxicological effects	
Acute toxicity Acute oral toxicity	: Not classified
Acute inhalation toxicity	: Not classified
Acute dermal toxicity	: Not classified
Skin corrosion/irritation	: Not a skin irritant.
Serious eye damage/eye irritation	Not an eye irritant. Mechanical irritation is possible.
Respiratory or skin sensitization	: Not classified
Chronic toxicity	
Carcinogenicity	: Not classified
Germ cell mutagenicity	: Not classified
Reproductive toxicity	
Effects on fertility / Effects on or via lactation	: Not classified
Effects on Development	: Not classified
Target Organ Systemic Toxicant - Single exp The substance or mixture is not c exposure.	oosure classified as specific target organ toxicant, single

Target Organ Systemic Toxicant - Repeated The substance or mixture is not o exposure.	exposure classified as specific target organ toxicant, repeated
Aspiration hazard	: Not applicable.
12. Ecological information	
12.1 Toxicity Ecotoxicology Assessment	
Acute aquatic toxicity	: Not classified
Chronic aquatic toxicity	: Not classified
12.2 Persistence and degradability	
Biodegradability	: Not expected to be biodegradable.
12.3 Bioaccumulative potential	
Bioaccumulation	: This material is not expected to bioaccumulate.
12.4 Mobility in soil	
Additional advice Environmental fate and pathways	: This material is not volatile and insoluble in water.
12.5 Results of PBT and vPvB assessment	
This substance/mixture contains no compon bioaccumulative and toxic (PBT) or very pers	
12.6 Other adverse effects	

Additional ecological information

: Ecotoxicity is expected to be minimal based on the low water solubility of polymers. No data available on this product. However, birds, fish and other wildlife may eat pellets which may obstruct their intestinal tracts.
